NURSERY = ROUTE 62

Our Greetings for the Garden Season

To our customers we wish to express our hearty thanks for their kind patronage of the past years. We will continue our endeavors to serve faithfully; to do our part to maintain this patronage, and to bring more of our customers into contact with our work.

We have arranged in this booklet some lists of hardy plants, including some of the new and more choice varieties, for your convenience in selecting material for your home grounds and gardens. We also offer a limited number of choice Annuals in the most desirable sorts, and we would be pleased to grow special kinds if notified in advance.

We maintain a complete Landscape Service in a class outside of the ordinary. We plan with vision for the years to come; arrange the planting so it may grow to the best advantage, strongly believing in the proper plant for the proper place. We will be very glad to call at your home and prepare plans for any treatment you may desire. Our service is equipped to take care of your needs year after year, such as spraying, pruning, tree work, and the general supervision of private estates. Our gardeners are of a high type, and are thoroughly trained in the proper methods.

In all our charges, the prices have been reduced in conformity with the times, and we are not to be undersold for quality of stock or efficiency of service by any reliable firm. We guarantee that our stock is alive and healthy at the time of shipment. Beyond that we have no control and give no other guarantee. Any just complaints, however, will be given careful attention.

Visitors are always welcome at our nursery.

Please address all orders and inquiries to

Features of Our Landscape Service

THE PLAN

The importance of a well-considered plan cannot be under-estimated, whether it be for a foundation planting, a large formal garden, a simple, naturalistic grouping, or re-arrangement of established planting. If you are planning to build, by all means study your landscaping plans in connection with the house architecture. Plans may be carried out in units as your budget allows.

PRUNING AND SPRAYING

Many places have fine trees and shrubs of several years growth. Do not allow them to be lost through neglect and lack of proper treatment at the right time.

LAWN CARE

The pride of every home is a fine, beautiful lawn. This is possible if it is given good food to nourish it, and good care to keep it in a healthy condition. A high-quality grass seed is also essential. Why not invigorate your lawn this year with some good plant food?

FERTILIZERS

We recommend to our customers and use in our work the best fertilizers suited to particular needs and locations, for lawns, trees, shrubbery, rose and flower beds. We give special attention to the careful and correct application of these fertilizers.

RESULTS

Only by having a definite plan in mind, by the selection of good stock properly planted and aided by the right kind of plant food, the *regular* and *systematic* care of lawns, and the existing trees and shrubs and gardens as well as those newly set out, can one achieve the most satisfactory and worthwhile enjoyment which one's home and surroundings should bring. A well-planted and well-cared-for home increases in value as the years go on.

We believe that high-quality merchandise, reasonable prices, and efficient service always pay. We are willing and ready to help you at all times.

Primrose Dame. Pure yellow. 25c. and 35c. each, according to size of plant.

5 or more plants of one var., priced at 10 rate; 25 or more at 100 rate

SELECTED ROSES

We have taken extra pains this season with our stock of Roses, and are confident that they will give excellent satisfaction. The varieties are all of proven merit. It has been our custom in recent years to pot our roses early in the season, and have them start slowly without artificial heat. This method makes it possible to plant roses at any time without a check. Prices given are for potted roses.

Hybrid Tea Roses

Some newer varieties of great merit.

Better Times, Patent No. 23. Outstanding. Brilliant cerise-red; fine for cutting. \$1.50 each.

Countess Vandal, Patent No. 38. Vivid pink, lightened with salmon; fragrant. \$1.50 each.

Nigrette. Patent No. 87. Very deep velvety maroon; an interesting novelty, known as "The Black Rose." \$2.00 each.

ARONIA. Chokeberry

arbutifolia. Red Chokeberry. 4-10 ft. White or reddish. April-May. Bright red fruit.

2-3 ft.50	4.50
3-4 ft.70	6.30

melanocarpa. Black Chokeberry. 4-8 ft. White. April-May. Shining black fruit.

2-3 ft.50	4.50
3-4 ft.70	6.30

AZALEAS

These acid-soil loving plants mass well with the broadleaf evergreens and are distinct and beautiful additions to any planting. Azaleas lend themselves to all sorts of surprises and add alluring interest to a garden. Here and there a flame of orange or red, a patch of yellow, a touch of pink or a spread of colors from the rainbow; your garden will be made doubly interesting with Azaleas.

AZALEA

Each per 10

arborescens. Sweet Azalea. 5-15 ft. White and pink. June-July. Spicy, fragrant white flowers with pink stamens. Red foliage in autumn.

12-18 in.	\$2.00	\$18.00
18-24 in.	2.50	22.50

Pumila Picotee Delight. Light and deep salmon shades. 5c. each, 50c. per dozen.

Salmon Rose. 5c. each, 50c. per dozen.

BULBS FOR FALL PLANTING

For many years we have been supplied with bulbs from growers in Holland. These firms have always favored us with bulbs of highest quality which accounts for the most successful results. Among them we mention the first-appearing of the spring blossoms: Scillas, Snowdrops, Grape Hyacinths and Crocus, followed by Hyacinths and Narcissi. Then come the Early Tulips, single and double, and later the stately Darwin, the graceful Cottage, and the Breeder Tulips, in their rich and varied colors. Certain species are suitable for rock gardens as well.

Bulbs may be planted as entire beds, or as a border for other beds and replaced by Annuals after blooming; or if space is limited, small groups may be set among the Perennials here and there, or form bright knots of color against an evergreen planting.

A list of kinds and prices will be issued early in the fall, and we will be glad to forward same to anyone desiring the best in Bulbs.

We prune according to the most approved methods, assuring a bountiful bloom from your shrubs.

VIGORO

The ideal plant food developed by experts who have carefully tested and scientifically balanced all necessary elements in the right proportion to enrich the soil and produce full growth and beauty in lawns and plants.

TUBEROUS-ROOTED BEGONIAS

One of the most attractive summer plants that fills an unusual position is the Tuberous-rooted Begonia. The fact that it will grow and bloom continuously in partially shaded positions makes it a valuable acquisition.

They are unexcelled as plants for the terrace, either planted out or in pots. They thrive in a light soil consisting of leaf mold, peat moss, and garden loam with a slight mixture of sand. In regard to fertilizers, use them sparingly and in liquid form if possible. Remember to have them in partial shade for best results.

The colors are all very beautiful, from white to delicate shades of yellow, pink and salmon, and the deeper pinks and reds, and no class of flowers contains a greater variety of forms. Our Begonias have received silver medals wherever exhibited, and the stock is grown from the world's most noted specialists.

PRICES
